Detailed Action

Priority

Receipt is acknowledged of paper submitted under 35 USC 371 claiming priority from PCT/ EPO Application No. 02/07314 filed on July 02, 2002 which itself claims priority from German Patent Application No. 10131917.7 filed July 02, 2001 which papers have been placed of record in the file.

Information Disclosure Statement

The IDS filed on September 23 , 2004 has been considered and the initialed copy of the PTO-1449 placed in the file, along with instructions to the contract staff to mail a copy of the initialed 1449 with the instant Office Action.

Foreign and non-English language documents have been considered to the extent understood from drawings and English Abstract if any.

Allowable Subject Matter

Claims 1 to 17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include a method for creating a stepped structure on a substrate wherein the third layer of the series of layers on the substrate is an oxide layer and in step (e) the first nitride layer beneath the second oxide layer was removed. (see also International examination report of WIPO mailed 02/ 20/ 2004) .
